

TURBO EASY ADJUSTMENT INSTRUCTIONS

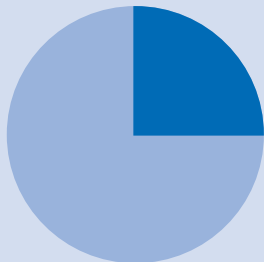

Take the Turbo Target Practice Challenge

Adjust a Turbo and you'll never top adjust with a key again!

LEFT

RIGHT

When you adjust a rotor, you are really just picking two targets, a right and a left.

The difference between rotors is how hard or easy it is to set the stream to stop at the left and right targets. Forget about 1/4 turn, 1/2 turn, fiddling with your key, clockwise, counterclockwise, turning the whole head in the ground!

To begin, locate the turret top and the arc adjustment ring on the Turbo

TOP

RING

TURBO TARGET PRACTICE WET ADJUSTMENT

- 1 TURN NOZZLE TOP TO THE RIGHT UNTIL YOU HIT YOUR RIGHT TARGET**
- 2 TURN NOZZLE TOP TO THE LEFT ALL THE WAY TO THE PRESET LEFT STOP**

IF THE LEFT STOP IS NOT WHERE YOU WANT IT...

- 3 HOLD THE RING AND TURN THE TOP TO YOUR LEFT TARGET**
- 4 RELEASE THE RING AND HIT YOUR RIGHT TARGET**

Congratulations! You have won the Turbo Target Practice Challenge!
